

AIRPORT MARKINGS

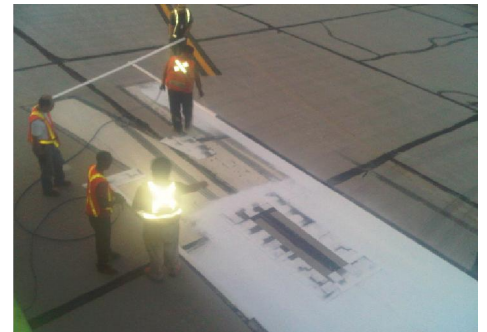

Airports require a precise layout of specialized pavement markings to ensure user safety. Whether taking off, landing, taxiing, or parking, safe aircraft movements rely heavily on high quality pavement markings. AAA Striping has many years of experience in this field. We have painted at military, international and regional airports.

Any of our durable products can be used for airport applications. This reduces the need for repainting which can save money and reduce disruptive runway closures down the line. If regular paint is preferred, low VOC solvent paints are available which have higher durability than standard water based formulas.

For increased reflectivity, we can apply type III glass beads which are specially formulated for airport applications and have higher reflectivity than standard glass beads. In addition to line painting, we offer seal coating and crack sealing. These two procedures can greatly extend the life of runway surfaces, reducing the need for costly resurfacing.

About Us

AAA Striping and Seal Coating is a major road marking company based in Edmonton since 1981. We provide comprehensive road marking services to clients across Alberta and its surrounding provinces and territories. We specialize in both painted and durable roadway markings as well as asphalt maintenance.
